

Curious About how AI can Transform your Business?

Discover Your Priority Use Cases With Our Half-Day AI Assessment

Led by our expert consulting team, these sessions focus on identifying high-impact AI use cases tailored to your business, providing a clear roadmap for integrating AI technologies like Azure AI, GPT and more. Whether you're looking to enhance customer experiences, streamline operations, or automate key processes, our AI Assessment Workshop is designed to help your organisation discover practical AI applications that can deliver measurable outcomes.

How our assessment can help your organisation:

Expert Guidance

Partner with us to understand how Azure AI services can address your business challenges.

Personalised Advice

Identify potential Gen AI initiatives, including prioritised use cases and business value opportunities.

Planning for the Future

Develop a high level roadmap for adopting AI in your organisation based on your specific needs and goals.

Our AI Assessment covers a range of technologies including: Microsoft Azure OpenAI, Chat GPT, DALL-E, GPT-4, GPT o1, Whisper & OpenSource.

Half Day AI Assessment

What's Included?

- You will gain a high-level overview of the core Microsoft Azure AI services and products available: Azure Cognitive Services, Azure AI Applied Services, Azure Machine Learning and Azure Databricks.
- Our expert consultants will work with you understand your ambitions for AI adoption.
- We will explore and uncover which AI tools can assist you in meeting your business goals faster. You'll leave with a high level roadmap of guidance and next steps.

How is AI being used currently?

Customer Experience

A telecommunications company used AI to capture call summaries and insights, resulting in \$2 million in monthly savings and an 82% boost in customer satisfaction.

Intelligent Search

An e-commerce company used AI for personalised recommendations, leading to a 20% increase in average order value, generating an additional £850k.

Operational Efficiency

A pharmacy processing 6,000 prescriptions daily reduced the time from over a day to just 3-4 minutes by implementing Azure OpenAI, saving \$1.5 million.

Analysis Automation

A non-profit struggling to extract key data from complex documents deployed a private instance of ChatGPT linked to Power BI, allowing for rapid information extraction.
