

# Ready to Explore Microsoft Fabric for Your Organisation?

## Microsoft Funded Strategy Workshops Available for a Limited Time

Microsoft has provided us with funding to help businesses like yours explore their innovative analytics technology, Microsoft Fabric. For a limited time we're offering a small number of complimentary strategy workshops to support your organisation in discovering how Microsoft Fabric can elevate your data strategy. These sessions, led by our seasoned consulting team, will guide you through the platform's capabilities and demonstrate its potential impact on your business. It's a unique chance to gain insights into cutting-edge technology at no cost to your organisation.

### Key Benefits:

#### Expert Guidance

Benefit from our expertise as a Microsoft Data and AI Azure Specialist Partner and learn from our experienced consultants.

#### Personalised Advice

Develop a personalised roadmap for adopting Microsoft Fabric in your organisation based on your specific needs and goals.

#### Future Ready Analytics

Explore how Microsoft Fabric can unify your data silos, enhance real-time analytics and integrate AI capabilities.

Don't miss this limited-time opportunity to benefit from Microsoft's investment in your success. Contact us at [info@coeo.com](mailto:info@coeo.com) to book your workshop today.

# Half Day Strategy Workshop: Whats Included?

- We'll review your current data setup, and identify strengths and areas for improvement.
- We'll discuss your business goals and how better data use can help achieve them, setting realistic targets for your data strategy.
- We'll introduce you to Microsoft Fabric and Databricks, showing how these tools can solve your specific data challenges.
- Learn about Coeo Velox and how it can speed up your data modernisation, saving you time and money.
- We'll explore how AI can enhance your data analytics and discuss responsible AI implementation for your business.
- We'll answer your questions, offer tailored advice, and help you plan your next steps in data modernisation.

## Why Participate?

By participating in these workshops, you'll gain valuable insights into how Microsoft Fabric could address your specific data challenges and opportunities. You'll have the chance to discuss your unique needs with our experts and explore practical applications of this new technology in the context of your business.

### Get AI Ready

Understand how to integrate advanced analytics and AI services into your data strategy, opening new possibilities for innovation.

### Optimise Costs

Explore how data-driven automation can streamline your processes, potentially reducing costs and boosting productivity.

### Unify your Data Silos

Learn how to bring your scattered data together, enhancing your analytical capabilities and decision making processes.

### Real time Analytics

Discover how to use immediate data analysis for timely insights, helping you respond faster and make better decisions.
