

Ready to Migrate Your Databases to the Cloud?

Get Your Roadmap With Our Azure SQL Modernisation Workshop

We are offering specialised workshops designed to guide your organisation through the process of modernising with Azure SQL. These sessions, led by our experienced consulting team, will help you outline a migration strategy, assess potential deployment options, and plan the best path forward for your SQL Server environments. Whether you're exploring migration for the first time or looking to optimise existing plans, our team will work with you to understand your specific needs and create a roadmap for success.

Key Benefits:

Expert Guidance

Benefit from our expertise as a Microsoft Data and AI Azure Specialist Partner and learn from our experienced consultants.

Personalised Advice

Develop a personalised roadmap for migrating to Azure SQL based on your specific needs and goals.

Fully Managed Service

Understand how Azure SQL manages your environment, reducing your administrative burden and freeing up time.

Contact us at info@coeo.com to book your workshop and start planning the best path forward for your SQL Server modernisation with Azure SQL.

Half Day Planning Workshop: What's Included?

Before the workshop begins, we'll help you identify a target SQL instance for modernisation and support you in running our Data Platform Assessment for Migration (DPAM) tool to identify migration blockers and gather performance data to estimate potential costs.

During the workshop, we'll:

- Introduce the Azure SQL family and their benefits.
- Explore the features that make Azure SQL ideal for database workloads.
- Discuss how we've helped clients previously and the technical challenges we overcame.
- Summarise DPAM findings including a potential target deployment architecture and estimated costs.
- Provide tailored recommendations for migrating your databases to Azure SQL.

Why Participate?

By participating in these workshops, you'll gain valuable insights into how Azure SQL can address your specific database migration challenges and opportunities. Our team will guide you through the migration process, helping you understand the benefits, potential hurdles, and best practices for moving your databases to Azure.

Learn from Experience

Advice and guidance from Consultants with real-world database migration experience.

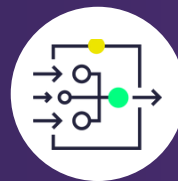

Help Your Business Case

Understand your migration options as well as the costs and savings associated with each.

Preparing to Modernise

Explore what needs to be done before you migrate to Azure SQL.

Project your Costs

Understand what your potential running costs might be when migrating to Azure SQL.
